**New Horizons Elementary School & Tiger Shark Cove Park Recreational Complex**

**Owner:** School District of Palm Beach County

**Client:** Village of Wellington and the School District of Palm Beach County

**Services:** Site Planning  
Preliminary and Final Engineering  
Permitting  
Construction Administration  
Construction Observations

**Project Description:**

Our principal directed a team of engineers and architects to plan, design, and construct the project from concept to completion within the established budgetary and scheduling constraints. Costing \$1.2 million at completion, the elements associated with the recreational complex consisted of three illuminated softball fields, one practice field, a 3,000 S.F. scorekeepers & concession building, a new access drive, and parking to accommodate about 120 vehicles.

Contract documents were prepared for the ballfields, the buildings, roadways, parking, water, sewer, and drainage to serve the complex. Provisions were also included to provide water, sewer, and drainage for a future adjacent community park.

Extensive coordination and permitting was required from key regulatory agencies including: the US Army Corps of Engineers, the Village of Wellington, SFWMD and PBC Health Department.
